MEHMOOD UL HAQ

Full-Stack Software Engineer • Stockholm, Sweden

+46 76 438 8438 | mehmoodulhaq14@gmail.com | Linkedin | Portfolio & CV

SUMMARY

Full-Stack Software Engineer with 6 years of experience building, scaling, and **deploying product-focused web applications to production** using **Angular, React, TypeScript, Node.js, and GraphQL**. Experienced in end-to-end feature ownership, maintainable architecture, API development, application modernization, and production delivery, with a strong focus on simplicity, scalability, reliability, and customer experience.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React, Next.js, Angular, AngularJS, HTML5, CSS3, Responsive Design, Redux, NgRx, RxJs, Angular Signals, Tailwind CSS, SASS/SCSS, Webpack, Accessibility (WCAG), Highcharts, Storybook

Backend & APIs: Node.js, NestJS, Express.js, REST APIs, GraphQL, Microservices, SSE, WebSockets, Authentication, Stripe

AI & Agents: Google ADK, AI Agents, LLMs, Tool Calling, MCP, AI-Assisted Development (Codex, Claude, GitHub Copilot)

Databases & Cloud: SQL, PostgreSQL, MongoDB, Redis, Firebase, Docker, GCP, Azure, OpenTelemetry, Database Design

Testing & Tools: Unit Testing, Integration Testing, End-to-End Testing, Jest, Cypress, CI/CD, GitHub Actions, Code Review, Git, GitHub, GitLab, Postman, Agile, Scrum, System Design, Observability, Prometheus

EXPERIENCE

Full-Stack Engineer | Hive Streaming
May 2024 – Present | Stockholm, Sweden

- Build and scale enterprise video analytics web app using **Angular** and **TypeScript**, designed frontend architecture.
- Built an **MCP** analytics layer using **Node.js**, **TypeScript**, and **Hono**, enabling secure AI assistant access to analytics data through **OAuth, JWT** authorization, and **PostgreSQL** integration.
- Contribute to **CI/CD pipelines** and containerized deployments using **Docker**, **Azure**, and automated development workflows, improving build, testing, and delivery processes.
- Modernized legacy **AngularJS** modules to **Angular**, reducing technical debt across enterprise workflows.
- Introduced a **headless CMS** using **KeystoneJS**, adopted as a centralized content solution across engineering teams.
- Develop reactive features using **Angular Signals** and **NgRx** for state management and predictable data flows.
- Build backend services with **Node.js** and **NestJS**, developing **GraphQL** APIs for efficient data exchange.
- Build analytics dashboards and complex data visualizations using **Highcharts** for enterprise streaming insights.
- Improve UI reliability through unit and **E2E** testing with **Jest** and **Cypress**; document components with **Storybook**.

Software Engineer | Furhat Robotics
Sep 2023 – Apr 2024 | Stockholm, Sweden

- Owned frontend development of a new **React-based** control interface for **conversational robots**, built from the ground up with a UI/UX designer.
- Replaced basic HTML controls with a modern interface for managing **robot interactions**, including speech and facial expressions.
- Built the application for web and desktop using **React** and **Electron.js** for a consistent cross-platform experience.
- Integrated the React frontend with the existing **Kotlin** application to connect UI with core robot functionality.
- Built reusable UI components with **React** and **Tailwind CSS**, improving consistency and maintainability.
- Improved **CI pipelines** with automated build and test checks, reducing manual verification before releases.

Founding Engineer | Hypertype
Sep 2022 – May 2024 | Stockholm, Sweden

- Joined as **Founding Engineer**, taking broad ownership of product development, architecture, and cloud infrastructure.
- Architected and maintained **React-based** Google **Chrome Extensions** across the full product development lifecycle.
- Integrated **Stripe payment** flows, handling subscriptions and payment processing within the product.
- Designed scalable frontend architecture and built responsive, reusable components using **React** and **Next.js**.
- Implemented product analytics and event tracking using **Snowplow** and **Google Analytics**.
- Worked with **GCP**, **BigQuery**, and **Firebase** to support cloud, data, and application needs.
- Collaborated closely with the **CTO** on product roadmap planning and technical priorities.
- Helped establish the engineering **hiring process**, conducting technical interviews and evaluating candidates.

Full-Stack Engineer | Mercurial Minds
Feb 2021 – Jul 2022 | Islamabad, Pakistan

- Served as **Project Lead** for a 3–4 person engineering team, coordinating frontend and backend development.
- Led technical planning for projects translating requirements into tasks, estimating timelines, and distributing work.
- Built and maintained **RESTful APIs** using **Node.js** and **Express.js**, working extensively with **SQL** and **MariaDB**.
- Developed full-stack features using **Angular**, **Node.js**, **Express.js**, **MongoDB**, and **Bootstrap** within an MVC architecture.
- Integrated third-party services and implemented predictable frontend state management using **NgRx**.
- Provided hands-on **technical guidance**, reviewing implementation progress and resolving blockers.

EDUCATION

Stockholm University *Aug 2022 – Sep 2024*

Master of Science, Computer Science

COMSATS University Islamabad *Sep 2017 – Jun 2021*

Bachelor of Science, Computer Software Engineering
